DHEA 5 mg Sublingual Tablets
Dehydroepiandrosterone Dietary Supplement

DESCRIPTION
DHEA 5 mg Sublingual Tablets, provided by Nature’s Source™, contain the highest purity dehydroepiandrosterone (DHEA) produced under strict Good Manufacturing Practices (GMP).

FUNCTIONS
DHEA is a natural steroid hormone that is synthesized from cholesterol through pregnenelone by the adrenal glands. DHEA acts as an antagonist for glucocorticosteroid hormones and is the parent precursor for other important steroid hormones, such as estradiol and other estrogens, and testosterone. While not a precursor to progesterone, DHEA can indirectly influence progesterone synthesis through a feedback mechanism whereby pregnenelone is converted to progesterone based on DHEA levels. A part from these functions, DHEA also has important biological functions itself. Recent experimental and human studies show that DHEA is involved in a large variety of physiological processes, including immune function, brain function, bone metabolism, blood lipid metabolism, energy metabolism, the regulation of normal blood sugar and insulin levels, and the maintenance of lean body mass.

DHEA and its metabolite DHEA sulfate are present in human adult plasma in concentrations of 0.01-0.02 µM and 5 to 7 µM, respectively. DHEA sulfate levels are low in early childhood; begin to rise after age 7, peak at age 20-24, and then drop at a rate of approximately 20% per decade, until at age 85-90, levels are 10-15% of what they used to be at age 20-30. DHEA levels also decline under a variety of conditions of physiological stress, such as acute and chronic infections, and trauma. Vegetarians have been shown to have decreased DHEA levels as well.

INDICATIONS
DHEA 5 mg Sublingual Tablets may be a useful nutritional adjunct for individuals who wish to support the body’s normal DHEA functions.

FORMULA (#83025)
Each Bisect, Sublingual Tablet Contains:
DHEA 5 mg
(Dehydro-epi-androsterone)

SUGGESTED USE
Adults take 1/2 to 1 tablet daily as directed by physician only. May be taken sublingually by allowing tablet to dissolve in mouth or with water or juice.

SIDE EFFECTS
WARNING:
Please consult your physician before using this product. Not to be taken by individuals under the age of 18. Do not use this product if you have breast, uterine, ovarian or prostate problems. If you are at risk for or have prostate, breast, uterine or ovarian cancer you should not use this product. If you are pregnant, nursing or taking any prescription medication, especially other hormones or MAOIs (Monoamine Oxidase Inhibitors) consult with your physician before using this product. This product may cause changes in liver function, alterations in hormone profiles, increased facial hair, acne, and mood swings. This product may cause virilization in women.

STORAGE
Store in a cool, dry place, away from direct light. Keep out of reach of children. Do not refrigerate.
